

Kernels

Theorem

$\ker(\text{rref}(A)) = \ker(A)$ *and* $\ker(\text{rref}(A)) = \ker(A)$.

Trace $\text{tr}(AB) = \text{tr}(BA)$, and $\int_0^1 f(x) \, dx$ with $\sin x + \log 2 = 10$.

$$\lim_{n \rightarrow \infty} \frac{\log n}{n} = 0, \quad \sin^2 x + \cos^2 x = 1, \quad dx \wedge dy$$
