

For the latest release notes see <https://example.org/ftxc/changelog> or browse the project homepage at [the ftxc project page](#). Bug reports should be filed at <https://example.org/ftxc/issues> rather than emailed directly.

Ports and queries break as well, see the endpoint <https://example.org:8080/api/v1/items?filter=name&sort=asc&page=2> which is long enough to need the relation and query breaks after the colon and the question mark.
