

Body text before the algorithm, at the full measure.

Input: $n \geq 0$ and a base x

Ensure: $y = x^n$

```
1:  $y \leftarrow 1$ 
2: if  $n > 0$  then
3:    $y \leftarrow x$ 
4: else if  $n < 0$  then
5:    $y \leftarrow 1/x$ 
6: else
7:    $y \leftarrow 0$ 
8: end if
9: for  $i = 1$  to  $n$  do
10:  while  $i > 0$  do
11:     $y \leftarrow y \times x$ 
12:     $i \leftarrow i - 1$ 
13:  end while
14: end for
15: for all  $j \in S$  do
16:   $y \leftarrow y + j$ 
17: end for
18: repeat
19:   $y \leftarrow y/2$ 
20: until  $y < 1$ 
21: function POWER( $x, n$ )
22:  return  $x^n$ 
23: end function
24: procedure RESET( $y$ )
25:   $y \leftarrow 0$ 
26: end procedure
```

▷ the base case

27: A statement whose text runs on long enough to wrap onto a second line, which is where the list's left margin shows.

Body text after the algorithm.
